

# Our commitment to patients

BeOne Medicines is committed to developing innovative medicines against cancer by partnering with the global community to serve as many patients as possible.

Innovation alone isn't enough—we work to help patients access the medicines they need.

Cancer is personal. We meet people where they are in their journey and stand by them.

**As a global oncology company, we put patients first—this commitment drives everything we do.**

**We communicate** with honesty, transparency, and accuracy.

**We listen** with empathy, learn from patients and caregivers, and integrate their voices into our work.

**We respect** the healthcare provider–patient relationship.

**We empower** patients through education and resources to manage their disease.

**We back initiatives** that help patients lead fuller, more engaged lives.

Cancer has no borders. **Neither do we.**
